UP TO 50% LIGHTER OPERATION

The ProLift™ is up to 50% easier to operate than comparable drop-down style ladder racks. This makes it the easiest and safest drop-down ladder rack system on the market. Using unique patent pending mechanical advantages and high-performance spring assist struts, ProLift™ raises and lowers ladders with an almost effortless pull, saving you time and energy while reducing back and shoulder injuries.

Built on Adrian Steel's new flagship Profile™ rack system, the ProLift™ is low profile, lightweight and built to last.

AVAILABLE IN STANDARD-DROP & MAX-DROP OPTIONS

Standard-Drop ProLift™ has a single function that lowers the ladder to a single set height. Uses hook brackets to hold and secure ladders.

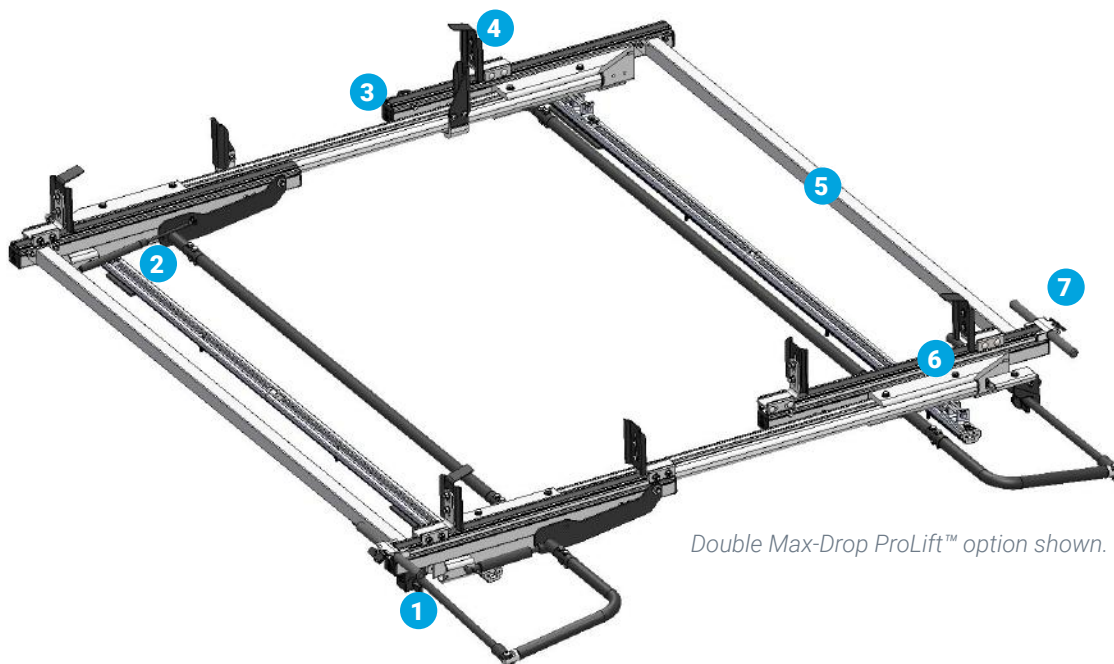

Only available for full-size low roof and compact vans.

Max-Drop ProLift™ has a single function that lowers the ladder to a single set height and a secondary function that lowers the rear of the ladder even further to a safer more ergonomic height. Most similar to our previous DDLR drop down series.

Available for Low, Mid & High Roof Vans
